## FULL-STACK ENGINEER | AI & AUTOMATION

Full-Stack Engineer specialized in AI and automation. I integrate the latest AI tools into every project to maximize efficiency and deliver high-quality software solutions with modern architecture.

### 01 EXPERIENCE

#### Full-Stack Software Engineer

2023 — Present

PhoneGS — Jerusalem, Israel

- Full-stack development of enterprise VoIP application using React, Node.js, and Laravel with microservices architecture
- Integration of Asterisk, FusionPBX, and WebRTC for real-time communication systems handling thousands of concurrent calls
- Daily implementation of AI tools (Claude, GPT, Cursor) to accelerate development workflow and improve code quality
- Strong technical autonomy with product architecture decisions, code reviews, and mentoring junior developers

#### Full-Stack Developer & Automation

2020 — 2023

Freelance — France

- Developed complete SaaS platforms and web applications from concept to deployment for various clients
- Built advanced web scrapers and workflow automation systems using Playwright and Puppeteer
- API integration specialist: payment systems (Stripe, PayPal), CRM, marketing automation tools
- Custom back-office development with real-time dashboards, analytics, and reporting systems
